both in technology and supplies.

CASY[®]ton: ready-to-use dilution liquid for cell cultures

CASY supplies are specially matched to the standardized CASY devices. Only the exclusive and regular use of CASY supplies guarantees long-term standardization of measurement results, as well as the long-term stability and optimal functionality of the equipment.

CASYton is a ready-to-use isotonic dilution liquid for cell cultures especially developed for use with CASY Cell Counter + Analyser Systems. The particle purity of the liquid guarantees a low background to the measurements. CASYton is manufactured according to the strict standards of the quality management system ISO 9000 ff.

Description

CASYton is an isotonic, particle-pure, odorless and colorless saline solution.

Properties

- CASYton reduces aggregation of cells on the measuring cup.
- It stabilizes the cells for the measurement time.
- The defined conductivity guarantees constant measurement results.
- Physiological pH and osmolarity ensure the preservation of the cell size.

Packaging

CASYton is available directly from Schärfe System in handy 10 liter cubitainers, including a plastic dosage tap.

Shelf-life and storage

The best-before date is indicated on the product packaging. CASYton can be stored at room temperature.

Waste disposal

Disposal must be effected in accordance with the cell culture laboratory regulations.
